

## Scientific and technical presentations in English

Presentations are an important part of any professional job. Today nearly everybody has to deliver a presentation from time to time. Your audience only has the chance to hear your talk and can't "re-read" when they get confused. Thus, it does not matter what you say in your talk, it is how they understood it.

The goal of this course is to help you present your work more effectively and to make you feel more confident and relaxed when making those presentations in English. You should know how to combine language and communication skills to get your message across clearly. You should be aware of different ways of influencing and making an impact on your audience.

Personal feedback from the trainer will help you focus on your strengths and enable you to make the most of your personal talents and qualities.

By the end of the course

- you will be able to make highly effective presentations whatever the subject is
- you will gain more confidence when presenting to an international audience in English
- You will learn how to apply seven key factors in making successful presentations
- The intercultural aspects of presentations will be referred to and covered in a natural, practical way as participants come from different countries with different cultures
- You will get personal feedback from a highly experienced trainer.

The course is designed for scientists and engineers but also suitable to all professionals who have to deliver presentations to various audiences. The focus will be on technical/scientific presentations but many of the ideas are applicable to any business presentation.

The course is highly participative and limited to 12 participants in order to ensure high quality standard.

Start of training: 09:00 am; End of training: 04:15 pm. We recommend making your travel arrangements AFTER RECEIPT OF OUR INVOICE as we can only then be sure that the workshop will take place. Unfortunately, in case of unexpected cancellation of workshops on our part, we cannot reimburse any travel or hotel costs.
