

KIT - An Introduction for New Staff Members

FREE PARTICIPATION: The course fee for KIT staff is paid centrally. The Karlsruhe Institute of Technology combines the missions of a university of the state of Baden-Wuerttemberg with teaching and research tasks and a national research center of the Helmholtz Association conducting program-oriented research on behalf of the Federal Republic of Germany. Within these missions, KIT operates along the three strategic fields: research, teaching, and innovation. This course gives new members of staff an overview of the structures, programmes, tasks, and the organization of the KIT. After an introduction, the divisions of the KIT are presenting their organization and a walk around an information marketplace will offer the opportunity to get into conversation with the members of the divisions about the KIT, its tasks and processes and other interesting questions of the attendees. On the second day, the participants attend workshops where they get a methodological equipment for the planning of their own scientific or professional future. Both days finish with a guided visit of interesting research projects and locations on campus north (day 1) and campus south (day 2).

The following topics will be covered:

- Research and development in KIT
- Research, teaching, innovation
- Management of research
- Management of innovations
- International Affairs
- KIT-Library
- Personnel – Service, Development and vocational training
- Further education and training
- Equal opportunities and compatibility of occupation and family
- Occupational Safety
- Medical Services
- Staff Council
- Relationship Management
- Promotion of young researchers.

All new employees will be invited to join this event.

Start of training: 09:00 a.m. End of training: 01:00 p.m.
